
WORK EXPERIENCE

Senior Software Engineer	Smartsheet	June 2021 - Present
---------------------------------	-------------------	----------------------------

- Designed, planned and led development of a top-requested sharing feature coordinating multiple engineers for over 9 months, announced at the company's annual user conference.
- Led deployment of multiple products and services into a new AWS region using Infrastructure as Code.
- Decoupled webhook-related API endpoints into a dedicated Node.js microservice handling over 2M requests per day, improving scalability and reducing latency by 60%.
- Remediated security vulnerabilities by migrating UI session storage into Redis.
- Optimized data processing, reducing data transfer volume by 40% and saving hundreds of millions of row operations daily through elimination of redundant operations.
- Mentored and onboarded engineers, and led technical interviews across teams.
- Managed on-call operations for an EKS based service using an event-driven architecture running millions of jobs per day, resolving live issues quickly and introducing better monitoring and incident-response practices.

Software Developer	SAS	March 2019 - May 2021
Associate - Senior Associate		

- Designed, implemented, and maintained a feature enabling customers to retrieve data, images, and files from third-party systems increasing the platform integration capabilities.
- Built and extended UI features using an internal shared components library and Kendo UI to enhance an investigation platform's functionality and improve user productivity.
- Migrated the codebase to the latest Angular version, leveraging Web Components to allow individual features to be integrated independently within another application.

Junior Web Developer	Adimo	June 2017 - February 2019
Intern – Full Time		

- Created an automated subscription feature using C#, from concept to launch, improving customer conversion rates.
- Automated campaign creation for sales teams through a Telegram bot, cutting setup time by 90% and enabling instant multi-campaign creation.
- Led development of cross-platform voice applications (Amazon Alexa, Google Home) using Node.js, expanding customers engagement channels.
- Developed postal code filtering for real-time product pricing and stock availability, enhancing shopping experience.
- Integrated external ratings systems (BazaarVoice, PowerReviews) via API to enhance product credibility and increase conversions.

EDUCATION

BSc Computing Science	Aberdeen University	2016 - 2017
------------------------------	----------------------------	--------------------

- Relevant Coursework: Data structures and Algorithms, Databases, Web Development, HCI
